Sing

Scream

Party on with a portable karaoke

Main Microphone

With the new Sing portable karaoke microphone system you're free to give the performance of your life - at home, your friends' place or anywhere there's a party.

Being totally portable, it's easy to make a party happen with Sing. It all comes complete in a smart black leatherette carry case.

Simply connect the cables to the DVD or video recorder slots on a TV (most televisions have these). You control everything else from the microphone. You can connect Sing to a stereo at the same time for an even better sound.

A tiny song chip in the microphone contains 1000+ songs, so you're sure never to run out of ideas for songs to sing. Sing microphones are available in gold or silver.

Select the song number from the stylish songbook, enter the number on the microphone keypad, and you're away singing in seconds. It's that easy.

The microphone keypad also lets you control functions like echo, key, tempo and volume.

Duet Microphone

Lyrics appear on the TV screen with a guide to follow the words.

Perform solo, or with the second wireless Sing Duet microphone, you can turn up the heat and have a whole group of friends gathered around.

You can have real singing competitions too. Sing will give each performance an on-screen score. Or simply enjoy the experience and don't bother to score.

You can sing, scream or shout as the karaoke party goes on! The Sing portable karaoke microphone system lets you and your friends do it all!

To see Sing in action, visit the Sing website www.sing.net.nz or call us on 021 177 1957 for more information and how to purchase Sing.
